

Glentham Life Sciences Ltd Unit 5 Leafield Way Corsham SN13 9SW United Kingdom

+44 (0) 1225 667 798 t: f: +44 (0) 2033 978 909 e: info@glentham.com www.glentham.com

Product Datasheet

GC2102 - IPTG, 99.5%, dioxane free

Pictograms

Product Details

Product Name IPTG, 99.5%, dioxane free

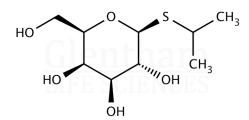

Glentham Code GC2102 **CAS Number** 367-93-1 **EINECS** 206-703-0

MDL-Nummer MFCD00063273

Related Categories Carbohydrates, Biochemicals, Detergents, Enzyme Substrates

Structure

Molecular Weight Molecular Formula : C₀H₁₈O₅S

Storage

Recommended storage temperature: +4°C.

Hazards and Transport

Not classified as dangerous for transport.

CLP Classification Carc. 2, Eye Irr. 2A

Signal Word Achtung **Hazard Codes** H351, H319

Precautionary Codes P281, P305+P351+P338,

P308+P313, P264

Glentham Product Specification

Physical

: White crystalline powder

Description

Identification (IR) : To conform to standard

Melting Point

110.0 - 114.0 °C

Solubility (5% in

methanol)

Clear, colourless solution Clear, colourless solution

Solubility (5% in water)

pH (5% in water) : 5.0 - 7.0

Specific Optical

Rotation 8

: -33.5 - -29.5 ° (c=1, water)

UV Absorbance (5% in water)

 $\leq 0.13 \text{ (at 300nm)}$

UV Absorbance

: ≤ 0.06 (at 400nm)

(5% in water)

1,4-Dioxane Absent Water (KF) : ≤ 0.5% ≥ 99.0% Purity (HPLC) Assay (HPLC) : ≥ 99.5%

Version : v1.0

About IPTG, 99.5%, dioxane free

IPTG is a compound commonly used in molecular biology, particularly in the study and use of the lac operon. It mimics the action of allolactose by binding to the lac repressor but, unlike its analogue, does not get hydrolyzed in the cell and so allows for the lac operon to be expressed at particularly high levels. This method is commonly utilised in the study of genetics and protein expression. Our product is dioxane free and is produced using raw materials of non-animal origin.
