

## Product Datasheet

### GK2606 - Hydroxychloroquine sulfate

Precautionary Codes

P305+P351+P338, P261, P301+P312

Pictograms

#### Product Details

|                    |                                       |
|--------------------|---------------------------------------|
| Product Name       | Hydroxychloroquine sulfate            |
| Glenthams Code     | GK2606                                |
| CAS Number         | 747-36-4                              |
| EINECS             | 212-019-3                             |
| PubChem SID        | 310274791                             |
| MDL-Nummer         | MFCD00078203                          |
| Related Categories | APIs, COVID-19 Research & Diagnostics |

#### Glenthams Product Specification

|                      |                                         |
|----------------------|-----------------------------------------|
| Physical Description | : White to off-white crystalline powder |
| Assay                | : $\geq 98.0\%$                         |
| Version              | : v1.0                                  |

#### About Hydroxychloroquine sulfate

No further details on record.

#### Structure

|                   |                                      |
|-------------------|--------------------------------------|
| Molecular Weight  | : 433.95                             |
| Molecular Formula | : $C_{18}H_{26}ClN_3O \cdot H_2SO_4$ |

#### Storage

Recommended storage temperature:  $-20^{\circ}\text{C}$ .

#### Hazards and Transport

|                                            |                           |
|--------------------------------------------|---------------------------|
| Not classified as dangerous for transport. |                           |
| CLP Classification                         | Acute Tox. 4, Eye Irr. 2A |
| Signal Word                                | Achtung                   |
| Hazard Codes                               | H302, H319                |
