

## Product Datasheet

### GP1861 - Isophosphamide

#### Product Details

|                    |                                                          |
|--------------------|----------------------------------------------------------|
| Product Name       | Isophosphamide                                           |
| Glentham Code      | GP1861                                                   |
| CAS Number         | 3778-73-2                                                |
| PubChem SID        | 310275426                                                |
| Related Categories | APIs, Biochemicals, Molecular Biology, DNA Cross Linkers |

#### Glentham Product Specification

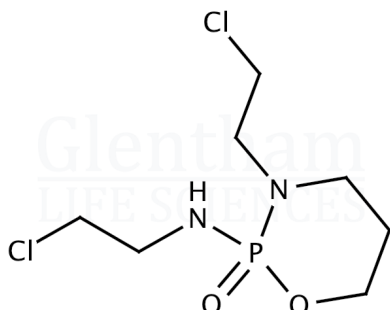

|                      |                             |
|----------------------|-----------------------------|
| Physical Description | : White to off-white powder |
| Assay                | : $\geq 98.0\%$             |
| Version              | : v1.0                      |

#### About Isophosphamide

No further details on record.

#### Structure

|                   |                          |
|-------------------|--------------------------|
| Molecular Weight  | : 261.09                 |
| Molecular Formula | : $C_7H_{15}Cl_2N_2O_2P$ |

#### Storage

Recommended storage temperature: +4°C.

#### Hazards and Transport

|                            |                                                         |
|----------------------------|---------------------------------------------------------|
| CLP Classification         | Carc. 1B, Repr. 1B, Eye Irr. 2A, Acute Tox. 3, Muta. 1B |
| Signal Word                | Gefahr                                                  |
| Hazard Codes               | H350, H360, H319, H301, H340                            |
| Precautionary Codes        | P305+P351+P338, P301+P310                               |
| UN Number, Class, PG (RID) | UN2811 - 6.1 - PG III                                   |
