

## Product Datasheet

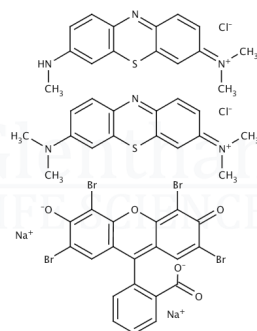

### GT3741 - Azure II eosinate

#### Product Details

|                    |                   |
|--------------------|-------------------|
| Product Name       | Azure II eosinate |
| Glentham Code      | GT3741            |
| CAS Number         | 53092-85-6        |
| MDL-Nummer         | MFCD00084753      |
| PubChem SID        | 310267238         |
| Related Categories | Dyes & Stains     |

#### Structure

Molecular Weight : -  
Molecular Formula : -

#### Glentham Product Specification

|                                     |                                                                                  |
|-------------------------------------|----------------------------------------------------------------------------------|
| Physical Description                | : Green to dark green powder                                                     |
| Solubility (0.1% in methanol)       | : Clear, blue-green solution                                                     |
| Wavelength(s) of Maximum Absorption | : $\lambda_{\text{max1}}$ : 520 - 524 nm, $\lambda_{\text{max2}}$ : 645 - 655 nm |
| Absorptivity (1%/1cm)               | : $\lambda_{\text{max1}}$ : 400 - 550, $\lambda_{\text{max2}}$ : 1250 - 1500     |
| Loss on Drying                      | : $\leq 10.0\%$ (105°C)                                                          |
| Version                             | : v1.0                                                                           |

#### About Azure II eosinate

No further details on record.

#### Storage

Recommended storage temperature: +20°C.

#### Hazards and Transport

Not classified as dangerous for transport.

|                     |                            |
|---------------------|----------------------------|
| CLP Classification  | Eye Dam. 1                 |
| Signal Word         | Gefahr                     |
| Hazard Codes        | H318                       |
| Precautionary Codes | P305+P351+P338, P280, P310 |
