

## Product Datasheet

### GX3163 - Titanium(IV) oxide Powder

220 nm, 95%

#### Product Details

|                |                                       |
|----------------|---------------------------------------|
| Product Name   | Titanium(IV) oxide Powder 220 nm, 95% |
| Glenthams Code | GX3163                                |
| CAS Number     | 13463-67-7                            |

#### Structure

|                   |                  |
|-------------------|------------------|
| Molecular Weight  | : 79.90          |
| Molecular Formula | : $\text{TiO}_2$ |

### Glenthams Product Specification

|                      |                                                         |
|----------------------|---------------------------------------------------------|
| Physical Description | : White powder                                          |
| Purity               | : $\geq 95.0\%$                                         |
| Note(s)              | : Surface treated with $\text{Al}_2\text{O}_3$ , rutile |
| Version              | : v1.0                                                  |

### About Titanium(IV) oxide Powder 220 nm, 95%

No further details on record.

### Storage

Recommended storage temperature: +20°C.

### Hazards and Transport

|                                            |                                                                                     |
|--------------------------------------------|-------------------------------------------------------------------------------------|
| Not classified as dangerous for transport. |                                                                                     |
| CLP Classification                         | Carc. 2                                                                             |
| Signal Word                                | Achtung                                                                             |
| Hazard Codes                               | H351                                                                                |
| Precautionary Codes                        | P280, P378ad                                                                        |
| Pictograms                                 |  |
