About Cefotaxime sodium salt

Cefotaxime sodium salt is a beta-lactamase resistant antibiotic of the cephalosporin class. The antibiotic works by binding to penicillin-binding proteins and consequently inhibits bacterial cell wall synthesis. It has broad-spectrum activity against gram-positive and gram-negative bacteria and is used to treat joint and respiratory tract infections. Cefotaxime has also been used to study antibiotic resistance. This product is the sodium salt of cefotaxime.
