4. First aid measures

4.1 Description of first aid measures

| | |
|--------------|--|
| Skin contact | Drench the affected skin with running water for 10 minutes or longer if substance is still on skin. Remove all contaminated clothes and footwear immediately unless stuck to skin. Transfer to hospital if there are burns or symptoms of poisoning. |
| Eye contact | Transfer to hospital for specialist examination. Bathe the eye with running water for 15 minutes. |
| Ingestion | Do not induce vomiting. Give 1 cup of water to drink every 10 minutes. If unconscious and breathing is OK, place in the recovery position. If unconscious, check for breathing and apply artificial respiration if necessary. Transfer to hospital as soon as possible. Wash out mouth with water. |
| Inhalation | If breathing becomes bubbly, have the casualty sit and provide oxygen if available. If conscious, ensure the casualty sits or lies down. If unconscious and breathing is OK, place in the recovery position. If unconscious, check for breathing and apply artificial respiration if necessary. Remove casualty from exposure ensuring one's own safety whilst doing so. Transfer to hospital as soon as possible. |

4.2 Most important symptoms and effects, both acute and delayed

|-----------------------------|---|
| Skin contact | Blistering may occur. Progressive ulceration will occur if treatment is not immediate. |
| Eye contact | Corneal burns may occur. May cause permanent damage. |
| Ingestion | Blood may be vomited. Corrosive burns may appear around the lips. There may be bleeding from the mouth or nose. |
| Inhalation | Exposure may cause coughing or wheezing. There may be shortness of breath with a burning sensation in the throat. |
| Delayed / immediate effects | Immediate effects can be expected after short-term exposure. There may be bleeding from the mouth or nose. |
