### **Product Datasheet**

# GE5162 - Silica Gel, self-indicating, blue to pink, 2 - 5 mm beads

### **Product Details**

| Product Name       | Silica Gel, self-indicating, blue to pink, 2 - 5 mm beads |
|--------------------|---|
| Glentham Code      | GE5162  |
| CAS Number         | 112926-00-8   |
| EINECS             | 231-545-4   |
| Related Categories | Biochemicals  |

| Sodium oxide<br>(Na2O)    | : | ≤ 0.3%   |
|---------------------------|---|--|
| Sulphate (SO4)            | : | ≤ 0.5%   |
| Particle Size             | : | Less than 2mm: ≤ 5%, Greater than 5mm: ≤ 5%  |
| Silicon dioxide<br>(SiO2) | : | ≥ 98%  |
| Note(s)                   | : | Beads gradually change colour<br>from deep blue to pink when<br>saturated with water. Indicator is<br>CoCl2. |
| Version                   | : | v1.0   |

## About Silica Gel, self-indicating, blue to pink, 2 - 5 mm beads

No further details on record.

#### Structure

| Molecular Weight  | : | 60.08            |  |
|-------------------|---|------------------|--|
| Molecular Formula | : | SiO <sub>2</sub> |  |

### Storage

Recommended storage temperature: +20°C.

### **Hazards and Transport**

Not classified as hazardous under CLP. Not classified as dangerous for transport.

### **Glentham Product Specification**

| Physical<br>Description         | : | Blue beads       |
|---------------------------------|---|------------------|
| pH (10%<br>aqueous<br>solution) | : | ≥ 3.5            |
| BET Surface<br>Area             | : | ≥ 600m²/g        |
| Pore Volume                     | : | 0.35 - 0.45 ml/g |
| Average Pore<br>Diameter        | : | 20 - 30 Å        |
| Water                           | : | ≤ 2% (at 145°C)  |
| Iron(III) oxide<br>(Fe2O3)      | : | ≤ 0.5%           |
