

## Product Datasheet

### GE0339 - Histamine dihydrochloride

#### Product Details

|                    |                                         |
|--------------------|-----------------------------------------|
| Product Name       | Histamine dihydrochloride               |
| Glentham Code      | GE0339                                  |
| CAS Number         | 56-92-8                                 |
| EINECS             | 200-298-4                               |
| Numéro MDL         | MFCD00012703                            |
| PubChem SID        | 310274634                               |
| Related Categories | Amino Acid Derivatives,<br>Biochemicals |

#### Structure

|                   |                          |
|-------------------|--------------------------|
| Molecular Weight  | : 184.07                 |
| Molecular Formula | : $C_5H_9N_3 \cdot 2HCl$ |

#### Storage

Recommended storage temperature: +4°C.

#### Hazards and Transport

Not classified as dangerous for transport.

CLP Classification Skin Irr. 2, Skin Sens. 1,  
Eye Irr. 2A, Resp. Sens. 1,  
STOT SE 3, STOT SE 3

Signal Word Danger

Hazard Codes H315, H317, H319, H334,  
H335, H336

#### Precautionary Codes

P342+P311, P280, P261,  
P305+P351+P338

#### Pictograms

#### Glentham Product Specification

|                          |                                            |
|--------------------------|--------------------------------------------|
| Physical Description     | : White to almost white powder or crystals |
| Identification (IR)      | : To conform to standard                   |
| Solubility (5% in water) | : Clear, colourless to solution            |
| Melting Point            | : 245.0 - 252.0 °C                         |
| Assay (Titration)        | : ≥ 98.0%                                  |
| Version                  | : v1.0                                     |
