Glentham Product Specification

White to off-white or beige **Physical**

Description crystalline powder Assay : ≥ 30FIP units/mg Chymotrypsin Conforms to EP

UV Absorbance 280nm: 13.5 - 16.5, 250nm: ≤ 7.0

pH (1% solution): 3.0 - 6.0Loss on Drying ≤ 5.0% Residue on : ≤ 2.5%

Ignition

Total Aerobic Microbial Count : ≤ 10000/g

Total Combined

: ≤ 100/g

Yeast and Mould

Count

Bile-tolerant gram-negative bacteria

: ≤ 100/g

Specified Microorganisms

Escherichia coli, Staphylococcus aureus and Salmonellae: Absent

About Trypsin, EP grade

Trypsin is a serine protease produced in the pancreas of vertebrates for use in the digestive system. Trypsin's primary function is to hydrolyse ingested proteins into smaller peptides or amino acids. It does this by cleaving peptide chains on the carboxyl side of arginine and lysine - unless either is followed by proline. For this reason, trypsin is often used in a laboratory setting to digest proteins and peptides for use in mass spectrometry and chromatography. It is also used to dissociate tissues during cell culturing and sorting.
