

## Product Datasheet

### GK2410 - Tetrabutylammonium hydroxide, 0.1M in methanol

#### Product Details

|                    |                                                |
|--------------------|------------------------------------------------|
| Product Name       | Tetrabutylammonium hydroxide, 0.1M in methanol |
| Glenthams Code     | GK2410                                         |
| CAS Number         | 2052-49-5                                      |
| EINECS             | 218-147-6                                      |
| Related Categories | Organics, Organic Bases                        |

#### Structure

|                   |                                              |
|-------------------|----------------------------------------------|
| Molecular Weight  | : 259.48                                     |
| Molecular Formula | : $[\text{CH}_3(\text{CH}_2)_3]_4\text{NOH}$ |

#### Storage

Recommended storage temperature: +20°C.

#### Hazards and Transport

|                    |                                                                                  |
|--------------------|----------------------------------------------------------------------------------|
| CLP Classification | Acute Tox. 3, Skin Corr. 1B, Acute Tox. 3, Flam. Liq. 2, STOT SE 1, Acute Tox. 3 |
| Signal Word        | Danger                                                                           |
| Hazard Codes       | H311, H314, H331, H225, H370, H301                                               |

#### Precautionary Codes

P280, P210, P304+P340, P305+P351+P338, P310, P260, P301+P310

#### Pictograms

UN Number, Class, PG UN3286 - 3 (6.1, 8) - PG II (RID)

#### Glenthams Product Specification

|                      |                            |
|----------------------|----------------------------|
| Physical Description | : Clear, colourless liquid |
| Concentration        | : 0.08 - 0.12 M            |
| Version              | : v1.0                     |

#### About Tetrabutylammonium hydroxide, 0.1M in methanol
