

## Product Datasheet

### GX7906 - Tetrabutylammonium chloride

Precautionary Codes

P302+P350,  
P305+P351+P338, P280

Pictograms

#### Product Details

|                                 |                              |
|---------------------------------|------------------------------|
| Product Name                    | Tetrabutylammonium chloride  |
| Glentham Code                   | GX7906                       |
| CAS Number                      | 1112-67-0                    |
| EINECS                          | 214-195-7                    |
| Numéro de registre<br>Bellstein | 3571227                      |
| Numéro MDL                      | MFCD00011635                 |
| CAS<br>supplémentaire           | 37451-68-6 ( $\cdot xH_2O$ ) |

#### Glentham Product Specification

|                             |                                                               |
|-----------------------------|---------------------------------------------------------------|
| Physical<br>Description     | : White to pale yellow crystals,<br>waxy solid or fused solid |
| Solubility (1% in<br>water) | : Clear, colourless solution                                  |
| Water                       | : $\leq 5.0\%$                                                |
| Assay (Titration)           | : $\geq 95.0\%$                                               |
| Version                     | : v1.0                                                        |

#### Structure

|                   |                     |
|-------------------|---------------------|
| Molecular Weight  | : 277.92            |
| Molecular Formula | : $C_{16}H_{36}ClN$ |

#### About Tetrabutylammonium chloride

No further details on record.

#### Storage

Recommended storage temperature: +20°C.

#### Hazards and Transport

|                                            |                          |
|--------------------------------------------|--------------------------|
| Not classified as dangerous for transport. |                          |
| CLP Classification                         | Skin Irr. 2, Eye Irr. 2A |
| Signal Word                                | Attention                |
| Hazard Codes                               | H315, H319               |
